

WORKING CLASS UNITE, TAKE THE OFFENSIVE AGAINST CAPITALIST!!

We need daycares, schools, hospitals, housing, better wages, better working conditions - we need a better system.

The system which we live under--CAPITALISM exploits and oppresses the working class. We, the workers, create the wealth of the society but a small group of people, the MONOPOLY CAPITALISTS, owns and controls it all.

Not only do they exploit the workers at home, they also exploit workers overseas, paying them slave wages--starving them. With the superprofits they get from overseas they buy off a certain sector of the working class - union leaders and community leaders. These misleaders block our sight of the enemy and try to divert and subvert our struggle.

There have been so many cuts, layoffs and closings in daycare, but our union leader didn't put up a real fight. They did not mobilize for this demonstration but they want to be on the negotiation delegation. The teachers, transit workers had been sold out by their union leaders in their recent contracts. They want us to pay for the crisis and make a donation for the election campaign!

All the layoffs and cuts in daycare, hospitals, schools and other social services which do not make profits for them, are signs that the Monopoly Capitalists can no longer control their problems. Third World countries kicked out the U.S. imperialists in Cambodia, Vietnam and in Mozambique also weaken the Monopoly Capitalist.

They are dying, but we the working class is rising. All over the world and at home we see workers, national minorities, fighting back at their oppressors. We have the support of the international working class.

U.S. and the other superpower, Soviet Union are trying to divide the world between them. Local wars in Angola, and the Middle East are used to prepare for a third World War.

They will bring in fascism at home by putting out repressive bills--Taylor Law, S1 Bill and the Rodino Bill which attacks Illegal Aliens. On the other hand they try to break the working class unity by pitting one group against another, using fake reforms like Title XX, forced busing plan, ERA, and community control. They also foster the illusion that the Capitalist system still works by using the Bicentennial celebration and Civil Right Bills.

HOW TO FIGHT BACK

Expose the misleaders, kick them out and aim at our enemy, Monopoly Capitalism. Build strong rank and file committees to take back our union and make them fighting organizations for the working class.

Fight on clear principles so we won't be sold out or get demoralized. The demonstration today is only the beginning fight.

We see ourselves as one united class - the working class. We create the wealth of society and we will soon win and control the wealth which we create.
